MINISTER ANNOUNCES THE DISTRIBUTION OF THE 1980-81 GRANTS FOR ONTARIO UNIVERSITIES

In a release issued from her office Colleges and Universities

Minister Bette Stephenson today announced 1980-81 operating grant distribution for Ontario's 15 universities, Ryerson Polytechnical Institute, the Ontario College of Art, the Ontario Institute for Studies in Education, Dominican College and the Bar Admission Course.

Global operating support of \$838.8 million, up about \$56.6 million from 1979-80, will be shared among the institutions. This amount will be distributed according to the recommendations of the Ontario Council on University Affairs. The grant for Ryerson Polytechnical Institute reflects an increase in levels of funding for that institution announced earlier.

A total of \$3,591,000 has been allocated to Laurentian University and its affiliated colleges, and to Lakehead University to offset the higher costs of operating in Northern Ontario.

Bilingualism grants of \$6,697,000 will be distributed among Laurentian University, the University of Ottawa, and York University. The following table shows provisional allocations for the operation of Ontario's university system:

Universities	Formula Grants ²	Northern Ontario Grants	Bilingualism Grants ³	Supplementary Grants	Recommended	1979-80		Per Cent Change

REPORT URGES MORE CAREER GUIDANCE FOR SECONDARY-SCHOOL STUDENTS

More student guidance is recommended for Ontario secondary school students in a survey financed by the Ministry of Colleges and Universities and conducted by Dr. Paul Anisef of Toronto's York University.

In tracing the progress of about 1500 students who were in Grade 12 in 1973, researchers found that secondary schools appeared to reinforce social inequalities which give distinct advantages to male, urban students of higher social and economic status. They found that these inequalities are 'passed up' the educational system and influence students' choice (if any) of further education and their eventual selection of occupation. (The study began with a survey of 2555 Grade 12 students; of these, the follow-up study succeeded in obtaining information from 1522, or 60 per cent.)

Changes, the report suggests, should begin in secondary schools in order to assure a broad range of opportunities for all students. In addition to more career guidance for students, the report, titled Is the Die Cast?, recommends:

- bringing parents into the guidance process at an early stage;
- co-ordinating secondary school programs more closely with those of post-secondary institutions;

- publicizing various forms of financial aid for students more widely;
- broadening the career interests of women through increased affirmative action programs.

Many of the problems uncovered by Dr. Anisef's report are among those being considered by the Secondary Education Review announced recently by the Honourable Bette Stephenson, M.D., Minister of Education and Minister of Colleges and Universities.
